Applicant has reviewed the Restriction Requirement mailed January 3, 2003, wherein the Examiner has requested election of one of the following groups:

- I. Claims 1-9 and 17, drawn to a method and apparatus for encoding and decoding transaction objects into and from electronic messages, classified in Class 707, subclass 102.
- II. Claims 10-16, drawn to a method for exchanging transactions between a service provider and a consumer in a distributed computer system, classified in Class 707, subclass 10.

In response to the Restriction Requirement, Applicant provisionally elects, without traverse, the invention of Group II (Claims 10-16), drawn to a method for exchanging transactions between a service provider and a consumer in a distributed computer system. Applicant cancels remaining claims 1-9 and 17, without prejudice or disclaimer, and reserves the right to reintroduce them in one or more divisional applications at a later date.

**In the Claims**

Please substitute the claim set in the appendix entitled Clean Version of Pending Claims for the previously pending claim set. The specific amendments to individual claims are detailed in the following marked up set of claims. The substitute claim set is intended to reflect that Applicant has cancelled claims 1-9 and 17, amended claim 15 solely to correct spelling, and added new claims 18-34 drawn to the elected invention of Group II. New claim 18 is a means-plus-function claim to be interpreted under 35 U.S.C. 112 paragraph 6, having means drawn to the last two elements of elected claim 10, and thus is supported by claim 10 and the now-cancelled claim 17. New dependent system claims 19-29 depend on claim 18. Claim 19 is supported by original claim 11. Claim 20 is supported by original claim 12. Claim 21 is supported by original claim 13. Claim 22 is supported by original claim 1. Claim 23 is
